### SUCCOR THE BABIES.

THE EVENING WORLD Sick Bables' Fund is being daily augmented by contributions from those whose hearts are touched by the sofferings of the babes in the densely popuof a much greater flow of dollars into this fund to accomplish the philauthropic end mimed at.

How it would add to the enjoyment of the vacation of one who is prosperous could be or she by a generous contribution feel that while enjoying the cooling sea breeze their benevolence was saving a life. Such can be the satisfaction of those who aid THE EVEN-ING WORLD in its work of charity in ministering to the little ones born to squalor and poverty.

Let not this appeal go unheeded. If bless. ings are showered upon you, show your thankfulness by placing to the parched lips of the poor, puny babes the means of life and hope. 'The Sick Babies' Fund is a beautiful charity. Sustain it.

### SULLIVAN'S LAST CHANCE.

Well, this is Sullivan's last chance to redeem himself and retrieve his fallen fortunes. There are many demands upon the charitaly disposed just now, but no appeal is stronger or goes more directly to every heart than that in behalf of the sick children of the

crowded tenement districts. It is a tough heart indeed that feels no pane at the thought of these little sufferers cooped up in noisome rooms, deprived of the southing sanlight and stiffed with impure air, unskilfully attended by kind but ignorant mothers because of the poverty which com-nels them to dispense with the attendance of paid physicians and improperly and inade-quately fed.

And this is why THE EVENING WORLD fund is started for defraying the expenses of a corps of energetic and enthusiastic physicians whose duty it shall be to built out and minis-ter to these baby sick ones, suffering the ills

and ailments of weather.

It should be borne in mind that the field is boundless, and that the larger the corps the more lives can be saved and the more suffer-ing can be alloyed.

The heated term is well started, and haste should be made by those who intend to contribute, that this charity may do its work speedily and before it is too late. There is room for more names on the list of the good, and every reader of The Even-ino World can give his mite.

However, three years later he made up his mind to a 'now or never' game, and with his brother visited her at Windsor Custle. Like more humble lovers he was placed in a rather embarrassing predicament by the non-arrival of his luggage, and was thus prevented from dining with Her Majesty on his first evening as her guest. For five days did Vectoria study him, and then, after first telling her adviser, Lord Molbertne, what she had decided to do, she sent for Albert saying that she desired to see him particularly. One account of the affair, which is valuable for its brevity, reads as follows: 'What the Queen told him was that she loved him with her whole heart, and that lows: 'What the Queen fold him was that she loved him with her whole heart, and that she desired to be his wire.' He Has Broken More Bones than Any Other Jockey.

Trampled On by a Horse in a New Orleans Race.

" Billy" Donohue, one of the best-hearted and best-natured Knights of the Pigskin, has probably had more bones broken than any other living jockey to-day. All the breaks resulted from falls when riding, and he is very fortunate in being alive to tell of it. His has been a terrible experience, and enough to make a less game man quit the business.

" Billy" has no idea of quitting, though, and says he never feels the least bit afraid in

I've had more exciting races, if ount fails and tumbles for anything, than any other men on the turf.

BOSTON'S LITERARY MEN. A Few of the Hub's More Noted Backmakers and Writers.

[Chicago Tribune's Boston Letter If you cannot be fashionable in Boston the the next best thing is to be literary. This does not imply that you should affect newspaper associations. There are a number of unjor and minor celebrities here whose Pegasus carries them above the unplearantly commercial atmosphere of daily journatism These people are received everywhere, and to know them is considered a privilege. If they do not take part in the ultra-gay swim it is because they have a coterie of their own equally exclusive, and in their notion more elevated. Their Club-the St. Botolph-represents the aristocracy of applied intellect just as the Somerset stands for gilt-edged idleness. In considering the followers of literature at the modern Athens one naturally divides them into four classes-namely; the big guns the younger set, the women writers, and the hangers on. The first-class has Dr. Holmes and Mr. Lowell as its foremost representatives, and is organized, foremost representatives, and is organized, malicious persons say, as a mutual admiration society. The second class includes the rising generation of pen-wielders, exemplified by such men as Robert Grant and John T. Wheelwright. The third class is filled with clever scribilers in petticoats, who do much admirable work, and nearly all of whom hate one another with undying animosity. As for the hangers on, who form the fourth class referred to, they are legion. Many of them are merely satellites revolving about the brighter lights and borrowing their radiance. Others produce manuscript by the ream, which they read to patient friends and submit with never-dying hopefulness to unappreciative editors. If you asked the women here—not the scribbling ones—who was their favor te literary idol in Boston they would doubtless say T. W. Higginson. He is just the fort of man that appeals to the is just the fort of man that appears to the feminine love of the ideal—of a poetic, imaginative temperament, with beautiful manners, winning ways and briliant conversational powers. He gets the highest prices for his literary work. His weekly articles in Harper's Easar are models of the essay style, whether they treat of questions sociologic or of friks on vinatores.

Higginson is excelled by only one man in Boston—namely: Dr. Edward Everett Hale. The latter is the most overworked individual in town. T. B. Abirich, editor of the Atlantic Montaly, may be called the apostle of style in literature. He has given his magazine a high reputation for its English. It is said of his prose that its quality is more in the manner than in the substance. He is an agreeable man, socially, and likes people to appreente the litterature and likes people to appreente the litterature are tot Boston's most tashionable woman. Mrs. John L. his knowledge of medicine, particularly anatomy gave him employment as a teacher and lecturer, though he never practised to any extent. He is popular and in conversation bubles over with will in appearance he resembles nothing so much as a shrivelled little Winter apple, and no one would guess from his appearance what a genius is at the core beneath that trost-ditten surface. All the people here lock up to him as to an oracle, and he gives response a rictly in that capacity.
